## DESCRIPTIONS OF **LENOVO** FEATURES

Think Shield:	A combination of hardware and software that work together to ensure what's on your display is for your eyes only.
Rapid Charge:	Charge battery up to 80% in just 60 minutes and keep moving.
PrivacyGuard:	Electronic privacy filter built into your system that decreases the angle of vision on your display so only you are able to view it.
PrivacyAlert:	An integrated software that works with the IR camera to ensure that if others look over your shoulder, a pop-up notifies you of the potential threat.
Think Shutter:	A physical camera cover which blocks the lens to ensure that you're only seen when you want to be.
ThinkPad Pen Pro:	This pen is stored in the ThinkPad X1 Yoga in a dedicated pen slot where it will recharge when it is stored. Once charged, it will give the user 130 minutes of active use.

# LENOVO: SETTING A HIGH STANDARD

Lenovo performs Mil-SPEC testing on all of their devices. Mil-SPEC is a set of standards designed to test durability, ruggedness, and reliability. These tests cover extreme environmental variables including temperature, pressure, dust, humidity and vibration testing.

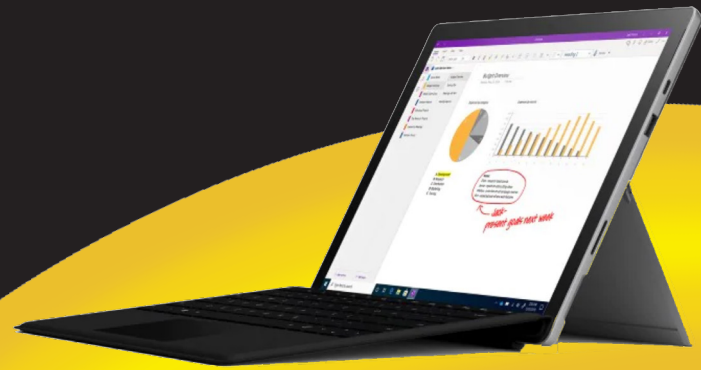

Lenovo exceeds these standards in all ThinkPad models, including all X & T series. These devices have successfully passed and exceeded Mil-SPEC standard tests.

Humidity:	91 - 98%
Low Temperature:	Storage at -13°F for 24 hours Operation at -6°F for 8 hours
High Temperature:	Storage at 145.4°F for 24 hours Operation at 109.4°F for 8 hours
Sand & Dust Test:	140 mesh silica dust for 6hr. cycles and silica sand for 90 min. cycles
High Vibration:	Tested while running and turned off
Mechanical Shock:	High acceleration and repeated shock pulses over 18 times
High Altitude:	Tests operation at 15,000 feet while running
Temperature Shock:	Performs in temperatures oscil- lating between -13°F and 140°F over 3 cycles of 2 hour duration
Solar Radiation:	Simulated UV radiation over 7 x 24 hour cycles
Fungus:	28 days with common fungus sources
