

LAPTOP CASES AND BAGS

SLEEVE

Something that just holds the laptop or Chromebook or iPad, and generally fits into a backpack or duffel bag. May or may not have a shoulder strap. Benefit of this is that active kids are only carrying one bag.

SHOULDER BAG

Generally has a large padded pocket for the device and an external pocket for the charger. Shoulder bags also feature a shoulder strap for easy carrying.

WORK-IN CASE

The chromebook or laptop is strapped into the case to make it difficult for students to remove. The benefit is that the device is always protected and always enclosed in the case.

CART-SAFE CASE

This is a snap-on type of case that allows the device to still fit in the charging carts. These type of cases are available for laptops and tablets.
