

FIREWALL SECURITY-AS-A-SERVICE

The capacity to stop viruses, ransomware, malware, and more before they enter your network, with all-in-one, comprehensive network protection. ITS is partnering with SonicWall to offer a bundled, managed, firewall solution: Firewall Security-as-a-Service provides you with the same level of network security that NASA demands and protects your network from a wide range of emerging threats.

BLOCK THREATS BEFORE THEY ENTER YOUR NETWORK

Entry points into your network may now include employee and student laptops, desktops and smartphones. Secure your network and data against sophisticated, modern-day threats with comprehensive protection that includes intrusion prevention, gateway anti-virus, anti-spyware, content/url filtering, and anti-spam services.

ELIMINATE BOTTLENECKS

The amount of traffic being scanned by your firewall, as well as the increasing amount of threats and malware attacking it, is quickly becoming more than many firewalls can handle.

KEEP YOUR NETWORK PRODUCTIVE

Your network performance can be bogged down by spam, unauthorized web activity and social networking traffic that competes with educational sites and connections. Ensure your staff and learners have the bandwidth they need with content and application control tools.

GET AN ALL-IN-ONE SOLUTION

Combine the features of traditional firewalls, gateway anti-malware products, intrusion prevention systems and content filtering software in a single solution. All of these security technologies are installed, configured, deployed and managed as one unit. Detailed event data is available through one reporting system so it is easier to identify threats early and take appropriate measures.

COMPREHENSIVE SECURITY AND SERVICE AT A MANAGEABLE PRICE

- ITS manages your up/down status
- ITS performs updates
- ITS configures and maintains offsite configuration backups
- Content Filter setup/service also available through ITS
- Block viruses, malware and ransomware before they reach your network*
- Control access to websites
- Meet CIPA regulations
- No upfront investment
- Predictable expense model

ADVANTAGES OF A MANAGED SECURITY SERVICE

- Outsource your network security to an experienced security provider
- Firewall expertly configured by SonicWall-certified engineers
- Turn-key solution delivered to your network closet
- Proactive monitoring and alerting
- Updating of firmware, software, and security updates
- Automated weekly network and security reports
- Report analysis by SonicWall-certified engineers
- Off-site SonicWall configuration backup
- Upgrade appliance as future enrollments, bandwidth and device quantity/types dictate change.

Managed Firewalls may be eligible for Category 2 erate; check with USAC for more information.

*security features perform best when combined with SonicWall Capture ATP and DPI-SSL
